Dear Maria Tzitzilaki,

Thank you for your inquiry. Please find attached the requested quotation for the electrodes. The electrodes need to be shipped in a cooled box. The transit time will be fast enough to Greece (cooling works for around 2 days).

I have also CC-ed our in-house electrochemist Lutz in this e-mail. Lutz, do you have any remarks regarding the quoted electrodes and their application?

Do you need a potentiostat as well or do you have one already? We focus on the miniaturization and portability of potentiostats and we are an OEM supplier as well. An implantable device is one step further. However the device itself could be external. Our instruments do have Bluetooth capabilities and an internal battery. We also developed a smartphone app called [PStouch](#) and we offer a wide range of software libraries (incl. one for an Android app).

Please let me know if you have any further questions.

Kind regards,

Willem van Velzen
